Summary

Hey there! I'm Pratik — a BTech student with a big vision and an even bigger drive to make it happen. Currently in my 3rd year, I'm on a mission to become a skilled DevOps engineer within few months, balancing hands-on learning with academic responsibilities. I'm all about building real-world skills — diving deep into Linux, Bash scripting, system administration, CI/CD, containerization, cloud platforms, and everything in between. My curiosity doesn't stop at theory; I believe in practicing what I learn.
